

## **Leckhampton with Warden Hill Parish Council Warden Hill Communities Working Group Monthly Report October 2024**

**This is a short over-view of the meeting.**

### **1) Changing Environment Event.**

This is planned for 2025 and will be a Parish Council Event. Planning is in the very early stages, but the aim is to show how the Warden Hill and Leckhampton Communities and individual households can best adapt to the changing climate.

### **2) MUGA.**

The WG wish to increase the number of exercise options within the MUGA aimed at much older children and very young adults. To ensure the correct equipment is installed two Parish Councillors visited Bournside to consult with year 6 pupils. Once the pupils have gained the views of their peers they will give the feedback to the Councillors. This will form the basis of the final decisions made by the full PC.

### **3) Front Gardens**

There is growing alarm in the WG of the number of front gardens disappearing under tarmac and block paving. Many seem to depend on the sewer system for drainage. During very heavy rain the sewer system will not be able to cope. This will result in flash flooding of property and was undoubtedly a factor in the flooding issues we had back in September.

### **4) Rain Garden in Front of Co-op.**

This has been slowly taking shape and was not finished at the end of October. All the work is being done by volunteers. We will keep you posted.
